

Screening Audiometry Course

Course Summary

Our highly qualified and experienced Acoustic Specialists provide practical and hands-on training to ensure that you'll feel confident to conduct accurate audiometric testing that meets legislative compliance at your workplace.

Delivery + Assessment

The two day training course will be in the form of lectures, participation and practical sessions. You will be instructed in the basics of Noise Management and Audiometric Testing and will be able to accurately complete Audiometric Screening Tests in the workplace.

Assessment will be based on practical work throughout the course and an assignment that must be completed at the end. There will also be a case study and multiple choice questions included during the two days. You must attend both days.

Certification

There is no formal certification required to conduct audiometric screening. At the conclusion of the course, your competency will be assessed and you will have the skills to conduct audiometric screening in accordance with AS/ NZS 1269.4
