Environmental Consultant – Full-Time

JTA Health, Safety & Noise is an independent OHS&E consulting firm that has been operating since 1988. Our focus has always remained the same – objective assessments of risks and the development of practical solutions. Our core mission is to provide Occupational Health and Safety and Environmental services of the highest standard. JTA offer a wide range of services and employees specialists across the OHS&E field including; Occupational Hygienists, WHS Consultants, Asbestos/Hazmat Consultants, Environmental Consultants, Acoustic Consultants, Audiometrists and Health Professionals.

Due to our growing client base and increasing demand for our contaminated land management services, we are seeking an experienced Environmental Consultant to join our Safety team in Melbourne and assist with day to day consulting responsibilities.

To be considered for this position you will have/be:

- Flexible, versatile, adaptable with a good sense of humour and a positive outlook
- Well-developed organisational and time management skill
- Able to work independently on complex projects, and within a team environment
- Well-developed report presentation, written and personal communication skills
- Attention to detail and a valid drivers' license

Responsibilities of the role:

- Preparation of proposals, including scoping and costing
- Preliminary and detailed contaminated land assessment
- Collecting, compiling and interpreting field and laboratory data
- Client liaison and supervising subcontractors during fieldworks
- Site history and desktop research for contaminated land assessment
- Report preparation & project management
- Internal and external meetings with colleagues, clients and authorities
- Provide assistance/support to occupational hygiene services, including asbestos, mould, and occupational monitoring.

Requirements:

- A tertiary degree in Engineering, Environmental Science/management, or similar
- Experience in a similar role, with (4 years'+) consulting experience in assessment through to remediation of contaminated sites and the associated report writing, preferably within a consultancy organisation
- An understanding of environmental regulations and legislation in VIC and key environmental issues relevant to major infrastructure, resources and property projects;
- Advanced use of MS Excel and Word - with the ability to be able to draft an environmental assessment report that requires minimal technical review are required
- Willingness and capability to provide training to junior staff members
- Willingness to learn and assist with occupational hygiene services.
- Current Australian Drivers Licence and Permanent Resident

Ideal Skills – Experience in all or any of the following will be looked upon favourably:

- Undertake both technical and non-technical tasks including; preparation and completion of fieldwork; collating, analysing, interpreting and presenting data; and preparation of various types of contamination related reports
- Observing and guiding site remediation activities and ability to manage small scale or low complexity projects, identifying and communicating risks to Project Managers
- Experience in remediation and site assessment, as well as ground water sampling or soil sampling
- Sound analytical and report writing skills, confidence in interacting with clients and a commitment to ongoing professional development
- Previous experience in asbestos, mould, and occupational monitoring is desirable, but is not required

What's on offer?

- Competitive salary package, commensurate with experience
- Ongoing training, career progression and leadership opportunities available
- Full-time position with an immediate start
- Melbourne Bayside office location
