

JTA Graduate Program

As one of Australia's leading independent workplace consultancies, renowned for delivering exceptional occupational health, safety, and environmental solutions since 1988, JTA is proud to support Graduates interested in a career in Occupational Health and Safety.

We extend an invitation to science graduates keen on engaging in a dynamic and comprehensive 18-month learning experience, culminating in a permanent position, to join our Graduate Program. This opportunity is perfect for those with a passion for science and a desire for diverse, fast-paced work within a supportive and thriving environment.

Participants will be immersed in JTA's diverse range of services across all departments through a structured 18-month program. This invaluable experience will empower you to identify and pursue your area of specialisation confidently.

Candidate Profile

- Adaptable, flexible and positive with a good sense of humour
- Excellent organisational and time management skills
- Capable of working independently, and within a team, on complex projects
- Well-developed written and personal communication skills
- Focused on superior customer service
- Self-motivated with attention to detail
- Advanced proficiency in MS Excel and Word
- Holder of a current Australian Drivers Licence (manual preferred) and Permanent Residency

Role Responsibilities

- Technical duties
- Report preparation
- Client Liaison
- Project Management
- Research and analysis
- Quote preparation
- Supporting senior consultants

Program Structure

If successful, you will spend time in each of our departments to provide you with a deep understanding of our business and prepare you for a successful career in Occupational Health and Safety. At the conclusion of the program, you will have the experience to decide which area of OHS you would like to specialise in.

Sales

Kickstart your journey with a month in our sales department where you will gain insights into JTA's business processes and engagement strategies. During this period, you will be involved in consulting, site visits and receive technical training in Occupational Noise Assessments and Audiometry.

Safety

During your time in the Safety Department, you will help clients manage their OHS obligations covering a range of technical areas including screening audiometry, occupational noise and air monitoring. At the conclusion, you will be fully equipped to conduct onsite assessments, analyse results and compile technical reports ensuring they are compliant with the relevant legislation.

Property

Our Facilities Department encompasses Hazardous Materials Management, including asbestos. You will be trained so that you can participate in research, surveying, sampling, and analysis. You will also learn how to report on a wide range of hazardous materials in the built environment, including asbestos and lead.

Environment

Whilst in the Environment Department you will learn how to qualitatively assess the risk to external stakeholders and residents from noise emissions, determine appropriate control measures and provide recommendations in a technical report. You will engage in noise and vibration monitoring and gain insight into the technical aspects of noise and vibration modelling.

About You

Preference will be given to candidates who have:

- Tertiary qualifications in a Science, Technology, Engineering or Mathematics (STEM) degree
- A genuine passion for science

In addition, we look favourably upon applicants with the following qualifications, however, they are not mandatory:

- Manual Driver's License
- Working at heights training
- White card
- Basic Principles of Occupational Hygiene Course
- NATA qualified Asbestos Fibre Counter

This role demands flexibility in work hours to meet industry needs and may involve regional/interstate travel. A competitive salary package, with scheduled increments upon competency achievement, awaits the successful applicant/s.

How to Apply

This is a wonderful opportunity to embark on a journey where your passion for science transforms into a fulfilling career. We recruit at various times during the year. Keep an eye on our [Seek company page](#) to learn when we are next recruiting.
